Shot Delivery

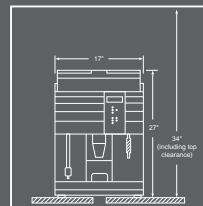

Auto Shut-Off
Steam Wand

Dual Bean
Hoppers

Push-Button
Operation

Only 17 Inches
Wide

Operational Advantages

- Push-button operation allows even a novice to make great cappuccinos or lattes
- Steam wand with auto shut-off guarantees consistent, accurate milk temperature and allows operator freedom to multi task
- Finesteam functionality allows for the precise delivery of required milk texture (Latte or Cappuccino style) at the push of a button
- Steam wand accommodates multiple types of milk
- Dual boilers allow simultaneous milk steaming and espresso dispensing
- Clear digital display reduces training time and potential for error
- Reminders can be programmed for maintenance activities such as cleaning and water softener changes, increasing operational life and reducing maintenance costs
- Dual bean hoppers with dedicated grinders for multiple bean types (regular, decaf, different roasts)
- Automated cleaning cycle takes only 5 minutes

Capacity

- Steams 32oz (1Ltr) of milk in 1 minute
- 70-80 cappuccinos/lattes per hour (16oz / ½Ltr cup)

Programming Flexibility

- 10 programmable selections
- Ability for 2 separate steam wand auto shut-off temperatures for customer preferences
- 6 separate volume settings for drink selection
- Grind, tamp and brew settings are programmable for each espresso selection
- Technical diagnostics menu for authorized service vendors

Specifications

- 208V, 30 Amperes
- 17"/432mm (W) x 21"/534mm (D) x 27"/690mm (H)
- 6kW steam boiler
- 3kW hot water boiler

- *Performance capacity indicative in nature*
